Self-Service ID Documents Dispensing Kiosks

Efficiency. Convenience. Security

Say goodbye to long queues and time-consuming processes with the innovative Self-Service ID Documents Dispensing Kiosks.

The cutting-edge solution redefines the document collection experience, it is designed to streamline the process of collecting new documents, providing applicants with a hassle-free experience, even beyond regular working hours.

Streamlined Workflow and Reduced Burden

With eSELF-ID, issuing authorities can securely store the personalized new ID documents in batch, such as ID cards, passports, health cards, driving licenses, and more. Seamlessly deployed in self-service centers, these kiosks allow applicants to verify their identity and effortlessly collect their new documents at any time, eliminating the need for counter services. This not only reduces the burden on issuing authorities' officers but also ensures a smooth and efficient workflow.

24/7 Access and Real-Time Monitoring

No more time constraints. The kiosks operate round the clock, providing applicants with the flexibility to collect their ID documents at their convenience. With real-time updates on operation and storage status securely transmitted to the back-end system, the officers can rest assured that all ID documents and their status are closely monitored, guaranteeing a secure and reliable service.

KEY FEATURES of eSELF-ID SERIES

Secure Identity Authentication

It supports applicant identity verification through ID documents and flexible biometric authentication, such as fingerprint recognition.

Efficient Document Management

Officers can conveniently store and retrieve documents in batches, simplifying the process of managing large volumes of documents and saving time and effort.

Uninterrupted Service

Even in the event of a power failure, the kiosk allows for the collection of the last stored document, ensuring uninterrupted service.

Enhanced Tracking Capability

Each document stored in the kiosk is assigned a unique number, facilitating manual search and tracking in case of power failure or other unforeseen circumstances.

Intelligent Status Follow-up

The system provides real-time updates on the operation and storage status of documents, allowing officers to monitor the status of documents efficiently.

Advanced Stock Management

The storage capacity of the kiosks can be configured for regular counting and inventory management, ensuring accurate stock management and preventing shortages or excesses.

*Discover the **eSELF-ID SERIES** models tailored to meet your specific ID card or passport issuance needs.*

eSELF-CARD

Offering a storage capacity of 4000 cards.

eSELF-BOOK

Offering a storage capacity of 1000 passports.

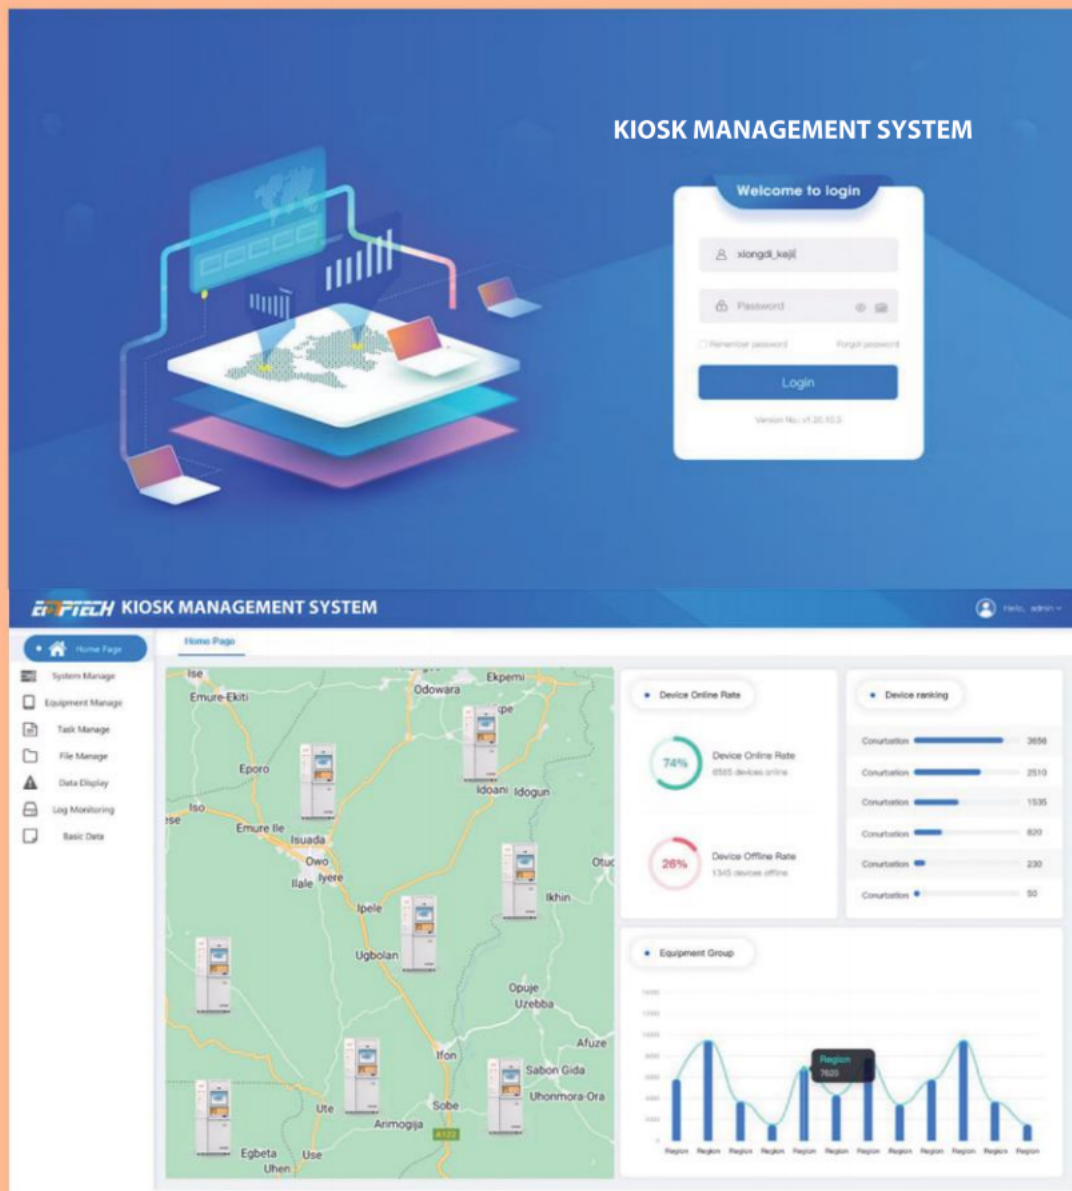

eSELF-BC

Offering a storage capacity of 800 cards and 1000 passports.

KIOSK MANAGEMENT SYSTEM

With our Kiosk Management System, managing multiple kiosks in different areas would be a matter of the past.

The system provides full visibility into the status and performance of your kiosk deployments, allowing you to monitor the status of the kiosks you deployed and the service data in real-time, and this would reduce the possibility of any critical issues from arising. Remote system upgrades and the ability to lock the kiosk when stolen further ensure top-level security and control.
