

BioTabPro

The Compact Multimodal Biometric Tablet for Field Enrollment

Bring Biometric Enrollment to the Point of Service

BioTabPro is a compact, multimodal biometric enrollment tablet designed to move seamlessly between fixed enrollment centers and mobile field operations.

It combines 4-4-2 fingerprint and dual-eye iris capture with applicant imaging, barcode reading, and ISO 14443 NFC card reading and encoding in one compact platform. With fewer standalone peripherals to transport, connect, and manage, field teams can deploy more efficiently while maintaining a consistent enrollment workflow.

BioTabPro helps agencies extend services to temporary registration sites, remote communities, and doorstep enrollment programs—making mobile biometric enrollment easier to deploy, more cost-effective to operate, and better suited to locations where permanent infrastructure is limited.

ONE DEVICE MULTIPLE CAPTURE MODES

**4-4-2
Fingerprint Capture**

Multi-finger capture in a compact form factor

**Dual-Iris
Capture**

Binocular iris acquisition with infrared illumination

**Photo & Barcode
Capture**

Front and rear imaging for applicant photos and barcode data

**NFC Card
Reader**

Supports ISO 14443 contactless card reading and encoding

Fewer peripherals. Greater mobility. One consistent field workflow.

IP 67

Field protection

10,000 mAh

Extended power

Android system

Current platform

Dual Micro SIM

Mobile connectivity

GPS + BeiDou

Dual-mode positioning

≤ 1.5 kg

Compact Portable Design

Industrial-Grade Biometric Capture, Closer to Every Community

BioTabPro integrates multimodal biometric capture into a tablet built for mobile deployment. It enables field teams to deliver secure, efficient biometric data collection across suburban and remote communities, making enrollment services more accessible and convenient for citizens.

WHY BIOTABPRO WORKS IN THE FIELD

DURABILITY

IP67 rated • -10°C to 50°C • Fast Charging

An IP67-rated enclosure helps protect against dust ingress and temporary water immersion. The -10°C to 50°C operating range and 10,000 mAh battery with fast-charging support help teams work across varied climates and locations where reliable power may be limited.

SECURITY

Anti-tamper rated • Secure chip • Optional PSAM

Anti-tamper construction and secure chip-based tamper protection add a physical security layer to the device. The device is also equipped with a PSAM encryption module for secure card applications.

INTEGRATION

Dual SIM • GPS + BeiDou • USB-C OTG

Dual Micro SIM, dual-band Wi-Fi, Bluetooth 5.0, and GPS/BeiDou positioning support mobile operations across changing network conditions. Android system, USB-A, USB-C OTG, and expandable storage provide a practical base for project software and peripheral integration.

WHERE BIOTABPRO FITS

Mobile Identity Enrollment

Government Service Registration

Remote Community Registration

Law Enforcement Field Operations

Industrial Data Collection

Warehousing & Logistics

Trusted Identity Products & Solutions Provider
