

MLP MiniCard

Desktop Decentralized Personalization

Ultra-Compact Design, Ideal for Decentralized Card Issuance

The MLP MiniCard is an innovative, compact, modular desktop system for card personalization, engineered for secure, decentralized identity document issuance.

It integrates EMPTECH's advanced Multi-Layer Personalization (MLP) technology, combining high-resolution inkjet printing with precision laser engraving within a single platform to deliver multi-layered security.

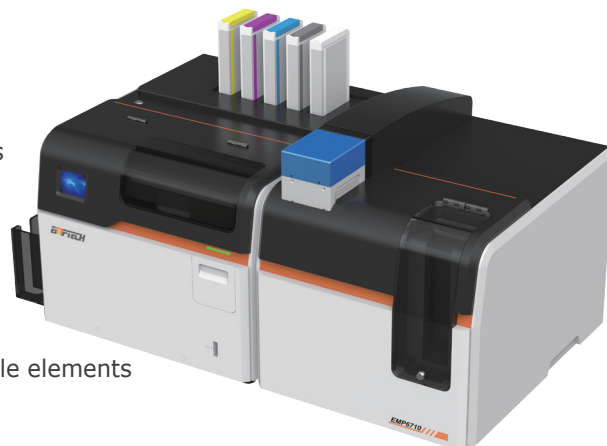

Powered by the same proven, state-of-the-art laser module used in the MLP ProCard, EMPTECH's personalization system, the MLP MiniCard can provide true-color results on polycarbonate cards while delivering laser-based security features. This ensures ICAO-compliant identity cards with excellent visual quality, strong tamper resistance, and long-term durability.

Specifically designed for decentralized volume card issuance, the MLP MiniCard's flexible and modular design allows easy adaptation to specific requirements. It is easy to deploy, operate, and manage, and supports various card sizes for programs such as national ID issuance, driver's licenses, and more.

KEY FEATURES

- Integrates EMPTECH Multi-Layer Personalization (MLP)
- Modular Design Combining Laser and Inkjet Personalization Modules
- Small Size, Big Result
- Support True Color Personalization on the PC-based Card
- Advanced Security Features, Including Microtext, MLI/CLI, and Tactile elements
- Flexible Design to Configure Depending on Demand
- Lightweight and Mobile by Design—Ideal for Decentralized Card Issuance

Printing Speed

Up to 80 cph with MLP technology.

Encoding Module

Support contact chip encoding, contact-less chip encoding.

Card Feeding and Collection

Input magazine can hold up to 100 cards, output magazine can hold up to 50 cards.

DoD Inkjet Printing Module

The print resolution can reach up to 1200 dpi. The advanced color UV printing technology ensures high-quality true color.

Dimensions

Standard:
1150mm(L)*475mm(W)*535mm(H)

Weight

Standard:
~110 Kg
